Cost Disclosure

Notice

A Note Regarding Cost Disclosures: Cost disclosures are intended to provide information regarding fees related to the use and/or subscription to certified functionality within the certified electronic health information technology and related health IT modules. Please note that the fees described herein are intended to provide notification of the existence of a fee where one exists and not a detailed fee schedule. Additional fees may exist for functions, services, subscriptions that do not involve or require certified functionality, services, and subscriptions. This information is subject to change without notice but is mandated to be updated, at minimum, quarterly each calendar year as per the ONC Conditions of Certification Maintenance requirements.

Revision History

The Revision History table below provides a record of all revisions made to this document throughout its life cycle. Updates are tracked by date the revisions were made, the version number, a brief description of the changes made and reason, as well as the name of the reviser and the approver.

Effective Date	Version #	Change Description/Reason	Created/Revised By	Reviewed By	Approved By
3/27/2026	2.1	Update Edition	Holly Black	Holly Black	Holly Black
1/20/2025	2.0	Update CHPL	Lora Woltz	Lora Woltz	Lora Woltz

Capability and Description

ONC Certification Criteria for Health IT applicable to Medflow Version 11.0: a1, a2, a3, a5, a12, a14, b1, b2, b10, b11, d1, d2, d3, d4, d5, d6, d7, d8, d12, d13, g3, g4, g5, g6

Medflow Version 11.0 is an EHR solution that supports healthcare professionals in ophthalmology and optometry in outpatient office and ambulatory environments. It allows users to perform a wide range of functions such as:

- Document, review, and edit patient health information including but not limited to problem lists, medication lists, medication allergy lists, family health history, and all aspects of the patient's eye examination and ophthalmic surgical procedure.
- Perform CPOE (computerized provider order entry) for medications, laboratory orders and imaging procedures.
- Electronically create prescriptions and prescription-related information for electronic transmission to pharmacies.
- Capture CQMs (clinical quality measures) and export these in standard file formats.
- Be alerted to possible CDS (clinical decision support) interventions.
- Direct Mail Solutions – This functionality allows users to send and receive Direct-based messages to/from other users of certified health IT systems. Direct messages may include clinical data, notes, and other information pertinent to the patient's care. Our Direct offerings support related MIPS and ONC requirements for sending and receiving transitions of care summary documents. We also support a range of other messaging options including fax and email, as well as printing conventional letters. Our Direct capabilities included bundled Health Internet Service Provider (HISP) services for facilitating message exchange. See additional types of costs that may apply for these and other third-party HISPs.
- Provide API solutions
 - Standardized Patient API requires use of myCare Portal
 - Application Access – All Data Access requires use of myCare Portal
 - Decision Support Interventions – predictive – requires Regulatory Compliance Platform and third-party DSI vendor
- Provide EHI Export capability for a single patient or all patients.
- Portal related activities

Medflow EHR Version 11.0 is designed to allow direct integration with diagnostic imaging and other diagnostic testing devices, or indirect integration with such devices via a third-party PACS (Picture Archiving and Communication System).

Cost Disclosure

Types of Costs or Fees and Additional Types of Costs or Fees

There is a base licensing and subscription fee for each provider.
Subscription fees may apply to eprescribing services.
Subscription fees may apply to portal-related services.
Subscription fees may apply to patient education document services.
Implementation fees may apply to DICOM device integration.
Subscription fees may apply to third-party registry services required for MIPS compliance.
There is a one-time onboarding fee and a monthly subscription fee per provider for FHIR Standardized API for Patient and Population Services (170.315(g)10) if using Blue Button Pro.

A connection fee will be charged to establish a connection to each third-party HISP with whom iMedicWare has no existing current relationship. The cost of establishing connections can be substantial and may exceed the annual licensing and subscription fee in some cases. All costs are passed on to the customer(s) who request the connection.
